

## Jungin Park, Ph.D

Research Professor  
Yonsei University  
C129, 3rd engineering building, 50 Yonsei-ro  
Seodaemun-gu, Seoul 03722

Email: [john.jungin.park@gmail.com](mailto:john.jungin.park@gmail.com)  
Web: <https://park-jungin.github.io/>  
Google Scholar: [Google Scholar](#)  
Phone: (+82)10-2330-8766

---

### (a) RESEARCH INTEREST

Computer vision, foundation model, video understanding, multimodal learning, efficient machine learning

### (b) EDUCATION

|                                                                                                                                                                                                                          |                                                 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| <b>Yonsei University</b><br><i>Ph.D. in Electrical and Electronic Engineering</i><br>· Advised by Prof. Kwanghoon Sohn<br>· Dissertation: Language-guided spatiotemporal representation learning for video understanding | <b>2018.03 – 2024.02</b><br><i>Seoul, Korea</i> |
| <b>Yonsei University</b><br><i>B.S. in Electrical and Electronic Engineering</i>                                                                                                                                         | <b>2012.03 – 2018.02</b><br><i>Seoul, Korea</i> |

### (c) EXPERIENCE

|                   |                              |                                 |
|-------------------|------------------------------|---------------------------------|
| 2025.04 – Present | Research Professor           | Yonsei University, Seoul, Korea |
| 2024.09 – 2025.03 | Postdoctoral Research Fellow | Yonsei University, Seoul, Korea |
| 2024.03 – 2024.09 | Visiting Researcher          | NAVER AI Lab, Seongnam, Korea   |

### (d) SELECTED PUBLICATIONS

\* equal contribution, † corresponding author(s)

1. **Jungin Park**, Jiyoung Lee<sup>†</sup>, and Kwanghoon Sohn<sup>†</sup>, Bootstrap your own views: Masked ego-exo modeling for fine-grained view-invariant video representations, IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR) (2025).
2. Kwonyoung Kim, **Jungin Park**<sup>†</sup>, Jin Kim, Hyeongjun Kwon, and Kwanghoon Sohn<sup>†</sup>, Faster parameter-efficient tuning with token redundancy reduction, IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR) (2025).
3. **Jungin Park**, Jiyoung Lee<sup>†</sup>, and Kwanghoon Sohn<sup>†</sup>, Bridging vision and language spaces with assignment prediction, International Conference on Learning Representations (ICLR) (2024).
4. **Jungin Park**<sup>\*</sup>, Jiyoung Lee<sup>\*</sup>, and Kwanghoon Sohn<sup>†</sup>, Dual-path adaptation from image to video transformers, IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR) (2023).
5. **Jungin Park**, Jiyoung Lee, Ig-Jae Kim, and Kwanghoon Sohn<sup>†</sup>, Probabilistic representations for video contrastive learning, IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR) (2022).
6. **Jungin Park**, Jiyoung Lee, and Kwanghoon Sohn<sup>†</sup>, Bridge to answer: Structure-aware graph interaction network for video question answering, IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR) (2021).
7. **Jungin Park**<sup>\*</sup>, Jiyoung Lee<sup>\*</sup>, Ig-Jae Kim, and Kwanghoon Sohn<sup>†</sup>, Sumgraph: Video sum-

marization via recursive graph modeling, European Conference on Computer Vision (ECCV) (2020).

**(e) PROJECTS**

1. Human-centric Immersive HyperSpace Global Research Laboratory, Ministry of Science and ICT – Global Basic Research Laboratory, 2025.06-Present
  - Benchmarking generative models using human-centric interaction and immersive components (In progress)
2. Omnimodal Data Construction and Integration towards Artificial General Intelligence, Ministry of Science and ICT – Mid-level Research, 2025.03-Present
  - Benchmarking audio-visual question answering (AVQA) task (In progress)
  - Developing multimodal large language models for AVQA (In progress)
3. Development of omnimodal-based General-purpose Artificial Intelligence, Yonsei University – Yonsei Signature Research Cluster, 2025.03-Present
  - Analyzing the modality gap between image and text data (In progress)
4. Development of Multimodal-based General-purpose Artificial Social Intelligence, Yonsei University – Yonsei Signature Research Cluster, 2022.03-2024.02, 2024.09-2025.02
  - Developed faster parameter-efficient tuning (FPET) with token redundancy reduction for foundation models, achieving 20% faster inference speed with 25% lower FLOPs on VTAB-1K and Flickr30K (presented at CVPR 2025)
  - Developed a cross-view video representation learning method using egocentric and exocentric videos (presented at CVPR 2025)
5. Development of multimodal Data Fusion and Artificial Social Intelligence for Comprehensive Scene Understanding and Prediction, Ministry of Science – Mid-level Research, 2021.03-2024.02
  - Developed vision-language multimodal large language models by bridging pre-trained vision and large language models based on optimal transport, demonstrating the effectiveness on image captioning, VQA, visual dialog, and retrieval tasks (presented at ICLR 2024)
  - Developed a parameter-efficient transfer learning method to adapt pre-trained image models to video tasks, requiring x10 lower FLOPs than video models (presented at CVPR 2023)
  - Developed a probabilistic self-supervised learning method for spatiotemporal representations, outperforming deterministic approaches on zero-shot and fine-tuned action recognition (presented at CVPR 2022)
  - Developed video-language multimodal interaction networks for video question answering, enabling the model to understand compositional semantics in video and language data (presented at CVPR 2021)
6. To Create AI Systems that Act Appropriately and Effectively in Novel Situations that Occur in Open Worlds, Institute of Information&Communication Technology, 2020.04-2022.03
  - Developed algorithms for autonomous delivery robots that can perform computer vision tasks in real-world environments
  - Developed memory-guided domain generalization networks for semantic segmentation (presented at CVPR 2022)

- Developed a novel online stereo adaptation method using meta-learning, enabling real-time (35.7 fps) depth estimation from streaming stereo images (presented at ECCV 2022)
7. Fundamental Research of Vision Algorithms for Comprehensive and Thorough Video Understanding, Ministry of Science, ICT, and Future Planning, 2018.03-2020.02
    - Developed temporal graph reasoning networks for video summarization, which is the first to introduce graph convolutional networks to video summarization (presented at ECCV 2020)

#### (f) HONORS & AWARDS

|      |                                                                    |                                    |
|------|--------------------------------------------------------------------|------------------------------------|
| 2023 | Academic Research Fellowship                                       | Yonsei University                  |
| 2019 | Outstanding 100 National Research Projects<br>· Research assistant | Ministry of Science and ICT, Korea |
| 2019 | CoVieW 2019 ICCV Challenge<br>· 3rd award                          | ICCV 2019 Workshop                 |
| 2019 | Workshop on Frontiers of Electrical Engineering<br>· 2nd award     | Yonsei University                  |

#### (g) PATENT

1. Jungin Park and Kwanghoon Sohn, Video Question Answering Apparatus and Method based on Graph Interaction, Jan. 2021, Korea (10-2806936)
2. Jungin Park and Kwanghoon Sohn, Video Summarization Apparatus and Method through Recursive Graph Modeling, Dec. 2020, Korea (10-2198480), PCT/KR2020/010755
3. Jungin Park and Kwanghoon Sohn, Video Action Recognition and Localization Apparatus and Method, Oct. 2020, Korea (10-2174658), PCT/KR2019/004798
